I can make the right decisions in critical situations, by logical analysis. I like to introduce me to a previously unknown technology. I aspire to enter the global labor market, so as not to be tied to the city or country. To do this, do the study skills Developer, Linux systems, and increased levels of English, in order to achieve DevOps skills.

SKILLS

Microsoft Server/Client architecture, System Administration of Microsoft Servers, Active Directory, DNS, DHCP, GP, Forefront TMG, MS SQL, MS Exchange, IIS, WSUS, Hyper-V, MS Remote APP, Citrix, MDaemon, Kerio, , FTP, Kaspersky Security Center, VMWare, HP Data Potector, , Symantec, Acronis, Microsoft Backup, TCP/IP, VPN, , VoIP, RAID, FreeBSD, Ubuntu server, LAMP, ownCloud, AWS.

EXPERIENCE

MPhC "Biola" LLP
Marth 2018 - present

System administrator

Management, administration, debugging and optimization of the company's information system:

• Created a fault-tolerant 3-tier backup system

• Optimized distribution of tasks between servers for not only reliable, but also more flexible service infrastructure.

• Implemented a server virtualization system based on Hyper-V

• Servers redesigned from scratch: internet gateway (kerio control), domain controller (ad, dns, dhcp, gpo), database server (MS SQL), file server (shadow copy), terminal server (remote app), antivirus (kaspersky).

• Made migration of mail to the Mdaemon server, which improved protection against hacking, spam, and control of correspondence.

• Constant analysis of the market, service providers and equipment. (a fault-tolerant communication system was created, providers were replaced with more reliable and cost-effective ones), the business processes of purchasing, repairing, refueling and delivering equipment to the office were economically debugged.

• Conclusion of contracts, selection of suppliers and analysis of the necessary software and equipment for the operation of the company's infrastructure

• Maintenance of the company's computer park, modernization, utilization, purchase, user support.

• Budgeting and analysis of the company's IT infrastructure needs.

• Successfully organized and completed a project to automatically send customer information from the database to postal addresses.

• Implemented a successful project to control the goods on the site via QR codes

• Implementation of an electronic document management system and business processes based on the ELMA system

INTERFOOD GMBH, LLP
April 2013 – September 2017 (4 years 6 months)

Head of the department of system administration

System administration (DC, TMG, Mdaemon, WSUS, KAV, MS SQL, 1C, Hyper-V)
Hardware resource optimization
Organization VPN ipsec network
The introduction of server virtualization

The introduction of automatic operating system updates
Organization Acronis & HP DataProtector backup system
The introduction of remote access systems "RemoteApp"
The introduction of e-filing system to support "Manage Engine ServiceDesk"
Organization of anti-spam system and shared calendars
The introduction MS SCOM
The introduction ownCloud file system

Internews Kazakhstan
System administrator

November 2012 – March 2013 (5 months)

System administration
The introduction of server virtualization system Administration

M&M Logistics
IT engineer

November 2010 – November 2012 (2 years 1 month)

System administration
Restore the logical network structure
The introduction of IP telephony Asterisk
The migration of mail from Lotus Notes 8.2 on MS Exchange 2010

Emex
IT Engineer

May 2010 – October 2012 (2 years 6 months)

System administration
Restore the logical network structure and VPN
Deployment wordpress for website
He participated in the introduction of ERP system.

TRC "Southern capital Almaty"
Symtem administrator

February 2009 – May 2010 (1 year 4 months)

System administration
The introduction of e-mail system Technical support L1

InterBeer LLP
System administrator

June 2007 – July 2008 (1 year 2 months)

System administration
The introduction of "LogisticMaster" program

TRC "Southern capital Almaty"
System administrator

April 2007 – June 2007 (3 months)

System administration
Deployment NewsFactory database on MS SQL server.

PH "Megapolis"
System administrator

May 2005 – November 2006 (1 year 7 months)

System administration
Technical support L1

EDUCATION

Central Asian Technical and Economic College   2002 – 2005

Electronic Technician, Computers, complexes, systems and networks,
Electronic Technician,

Graduate work perfectly well on LANs.

LANGUAGES

Russian (Native proficiency), **English** (Limited working proficiency)
